Price List

Foreword

WE have been in our present location since 1923 and can refer to thousands of satisfied customers and to R. G. Dun & Co., Bradstreet & Co., and to any bank or reputable business house in Bristol as to our reliability and responsibility. We are located on Lee Highway, U. S. No. 11, midway between Bristol and Abingdon, Va. Our location is especially favorable to the production of hardy plants, for use in all sections of the country, and our nursery is a veritable store-house of fascinating plant material. We invite you to write us, or to visit our nurseries, feeling sure that a trip through our plant will be both interesting and profitable.

TERMS. Terms are cash with order, or, to persons or firms of approved credit, we will extend thirty-day terms. Prices are f. o. b. Bristol, packed for shipment.

GUARANTEE. Any plant material purchased from us which should fail to live, the first season, from causes other than neglect or abuse will be replaced at one-half purchase price, provided the items are then in stock, otherwise, like credit on other varieties. Replacement shall be limited to one time, and all replacements are f. o. b. nursery.

The shipping season usually opens about October 1st, and continues with slight interruption, until the first of May, but we do much planting during the summer months with very gratifying success.

WOOD-HOWELL'S LANDSCAPE SERVICE

Few things pay such good and continuous dividends of genuine satisfaction and pleasure as well-planted home grounds. With the great wealth of plant material available today, you can be sure of achieving beautiful and individual effects. The modern way is to plant the whole grounds. Planning is the first step in achieving the completed picture. The realization comes with the actual planting of evergreens, trees, shrubs and flowers.

Our Landscape Department will gladly assist in working out the whole job to your entire approval. We are well equipped to make the plan, furnish the plants, and set them in their proper places on your grounds. The cost? You'll be agreeably surprised!

Phone or write us today—there is no obligation.

When ordering, please specify whether by freight or express. Most nursery stock is too heavy to go by parcel post.

You are cordially invited to visit us at any time, except Sunday, and we will take pleasure in going over our stock with you.

All orders, checks, etc., should be made out to Wood-Howell Nurseries, Bristol, Va.

CONIFEROUS EVERGREENS

Evergreens have a great advantage over deciduous trees in that they are beautiful both summer and winter and are perfectly hardy. When selecting conifers, for a foundation planting, one must keep in mind the smaller and slower growing varieties, while for specimen planting those of taller growing habit may be used. We offer a complete assortment of conifers for all purposes.

BROAD-LEAVED EVERGREENS

The Broad-leaved Evergreens hold their foliage throughout the winter. They are easily transplanted, most of them do well in partial shade as well as in sunny locations. Once established the Broad-leaved Evergreens will grow practically without care longer than most other types of plants.

There is a wealth of Broad-leaved material available today and they are being more extensively used than ever before. Among the most popular are Abelia, Ilex, Mahonia, Viburnum Rhytidophyllum and the Azaleas.

ABELIA GRANDIFLORA. (Glossy Abelia.) One of the most attractive plants, due to the fact that it combines a blooming shrub and evergreen foliage. Blooms from May to November.

HARDY ORNAMENTAL FLOWERING SHRUBS

Nature employs shrubbery extensively to fill the vacant places and we would do well to follow her example. The evergreen key plants and a free use of flowering shrubs complete the picture. Plant shrubs in masses of a variety rather than too many in a mixture. We grow many new and rare varieties selected for bloom throughout the season.

HARDY HERBACEOUS PERENNIALS

There is a strong appeal in the old-fashioned perennials, and with the many varieties now available, every corner of the grounds can be kept bright with color throughout the season. Gardening has retired to the rear-yard with a great impetus during the last two or three years, and we are prepared with nearly all sorts for Southern planting. In planting perennials we demand two things—varieties that will brighten the garden and those which can be cut for the house. We are quoting only the items which we have in stock, at the present time, for our perennial stock is subject to change and we can often supply many other varieties. Those suitable for the Rock Garden are marked with (*).
